

#6067 INSTA VENT

#6067 INSTA VENT DESCRIPTION:

Vents are a must-have for any container. Our 6067 INSTA Vents allow for multiple air exchanges during the heating and cooling cycle each day, helping to greatly increase air flow and reduce heat and moisture build-up inside your container. Each vent comes with an integrated bug screen, powder coated dark gray and is designed to be bolt-on so NO welding and NO painting required! Adding vents to your shipping container will help prevent moisture build-up, eliminate dangerous fumes and chemicals that can lead to fire or explosion, and allow optimal airflow. You should vent your container anytime you are storing household items, heavy machinery and automobiles, dry goods, and chemicals/pressurized gasses. It is recommended for each container to have two to six vents, depending on the length of the container. Bonus! The INSTA Vents install within 30 minutes!

***Also available in Zinc plated (6067 ZP) which is ideal for those in high-salt environments.**

SPECS

- 13 gauge steel construction
- 14" H x 14" W x 9" D / 355mm x 355mm x 228mm
- 8.5 lbs. / 4 kg
- Screen: 6" H x 9" W / 152.4mm x 228.6mm
- Screen holes: 4.5mm
- Powder coated dark gray

- #6067 ZP INSTA Zinc Plated Vent
- #6070 INSTA Manufacture Replacement Vent

INSTA Container Modifications is a proud charter member of the National Portable Storage Association (NPSA).

WARNING - All products that require installation or fabrication should never be done until you have the product in hand to take exact measurements. While every attempt is made to make sure product specifications are accurate, there is the possibility the products have been updated or a small variance between production made the measurement off. Installation of products may require some fabrication experience, and in no way does warranty cover installation mistakes.
